

Client: Apex Manufacturing Pvt. Ltd.
Process: Employee Expense Reimbursement

Standard Operating Procedure

1. The employee logs into the company expense portal and creates a new expense claim.
2. The employee enters the expense date, expense category, amount, currency, business purpose, and cost center.
3. The employee uploads the original invoice or receipt for each expense.
4. The employee submits the expense claim through the portal.
5. The system validates that all mandatory fields have been completed and that a receipt has been attached for each expense.
6. If mandatory information is missing, the system returns the claim to the employee for correction. The employee must update the claim and resubmit it.
7. If the claim passes the system validation, it is routed to the employee's reporting manager for approval.
8. The reporting manager reviews the expenses against the stated business purpose and verifies that the expenses comply with the company's travel and expense policy.
9. If the manager rejects the claim, the employee receives a notification containing the rejection reason. The employee may modify the claim and resubmit it.
10. If the manager approves the claim and the total amount is below ₹50,000, the claim is automatically forwarded to the Finance team.
11. If the total claim exceeds ₹50,000, an additional approval from the Finance Controller is required before the claim is sent to the Finance team for processing.
12. The Finance team verifies the receipts, expense categories, tax information, cost center, and approval history.
13. If Finance identifies an incorrect or unsupported expense, the claim is returned to the employee for clarification or correction.
14. If the claim passes the Finance review, Finance records the approved expense in the accounting system.
15. Finance schedules the reimbursement for the next available payment cycle.
16. The reimbursement amount is transferred to the employee's registered bank account.
17. The employee receives an email confirming that the reimbursement has been processed.
18. The expense claim and supporting documents are archived in the company's expense management system for audit purposes.
